

# CRAPS WITH CARDS

A New Twist On An Old Favorite.

Sycuan Craps is a variation of the traditional game of craps played with cards to determine which number is "rolled". The cards are printed with dice motifs valued 1-6. Players will roll and the numbers face up on the dice will dictate the appropriate cards to be used for each roll.

## COMMON BETS

### Pass Line

At the beginning of each session, the first two cards dealt is known as the "come out roll".

A puck, printed with the word "off" is placed on the layout. At this time, all bets on the Pass Line win on a 7 or 11, and lose on 2, 3, and 12.

Pass Line bets will continue to win or lose on these numbers until any other number (4, 5, 6, 8, 9, 10) is rolled. This becomes the point and is marked with the puck, which will be placed in the "On" position. Players will win 1 to 1 if they roll their point before a seven, in which case they will lose the pass line.

## COME BET

Once a point has been established, players may bet in the "Come". The Come can be thought of as a perpetual Pass Line, whereby bets win on 7 and 11, and lose on 2, 3, and 12. If the two cards dealt total any other number (4, 5, 6, 8, 9, 10) that number becomes the point for these bets.

The bets will be moved into the number where they will win if that number is repeated, and lose if a seven is rolled.

See Table Games for Official Rules

## PLACE BET

The place bet on one of the numbers (4, 5, 6, 8, 9, or 10) is a bet that the number (the total of the two cards dealt) will be dealt before a 7. While the puck is in the "On" position, these bets will win every time the numbers is totaled by the two cards dealt. They lose if the two cards dealt total a 7. Bets on the 4, 5, 9, and 10 should be made in multiples of \$5. Bets on the 6 and 8 should be made in multiples of \$6.

## PROPOSITION BETS

A "single roll" bet is the total of the two cards dealt.
